## Installation Instructions

**Important:** Accuride recommends first pre-drilling all mounting holes (Figures 1 and 3). Align the slide as described below to pre-drill.

1. Set the outer member back 5/64" [2 mm] from the cabinet or rack opening. Mount the slide member to the cabinet or rack (Figure 2) using #8 pan head screws (not included). Be sure slides are parallel.
2. For flush-mounted drawers, position the inner member 5/64" [2 mm] back from the front of the drawer or chassis. Mount using #8 pan head screws (Figure 4).
3. Check slide alignment by opening and closing the drawer/chassis. Any sign of binding indicates an issue with side space, alignment, or the cabinet and/or drawer are out of square. To adjust alignment, loosen the screws and adjust the slide position until movement is smooth. Retighten screws. Add additional screws if necessary to secure completely.

**Note:** To ensure proper slide operation, make certain that all mounting screw heads are fully seated inside the slide. Use #8 pan head screws (not included); do not use washers.
